
Underfloor Heating installation at Loftus Gardens, Phase 2

Designed and Installed by Certus Construction 2025

Certus Construction have been appointed by J G Hale Group to design and install the Underfloor Heating for the latest release of residential properties at Pobl Group's prestigious Loftus Garden Village development. Underfloor Heating has been provided to the Ground Floors only of the 54 properties on phase 2 of the development.

Certus designed the Underfloor Heating system with our manufacturing partner Reliable, including ZL 117503 Stainless Steel manifolds and 16mm PE-RT Underfloor pipe. Individual zone control is provided by programmable room thermostats and 230v system control units.

Certus also installed the Solshield Ultra Membrane, Floor insulation, 500g PE separation Layer and 50mm Fibre Reinforced screed, and so provided the complete "Heated Floor Solution" for this prestigious site development.

Certus Project Value	**£150,000 - £200,000**
Main Build Contractor	**J G Hale Group**
Client	**Pobl Group**
