

Underfloor Heating installation at Rhydfelin Primary School, RCT

Designed and Installed by Certus Construction 2023

New Welsh Medium Primary School located at the Rhydyfelin development in Rhondda Cynon Taf, will admit its first pupils in September 2023. The school was built on the current Heol y Celyn Primary School site and was completed on schedule.

The 2,366m² tacker fit Underfloor Heating system was designed by Certus in conjunction with Whiteheads Mechanical Services, and includes 12 manifolds over two floors, with 50 independent thermostatic control zones. The Stainless-Steel manifolds include temperature gauges, drain off valves and pressure gauges.

Certus also provided the Insulation preparation and Screed to the Ground and First Floors, and so provided the complete “Heated Floor Solution” for this new build school project.

Certus Project Value	£90,000
Main Build Contractor	ISG
Mechanical Contractor	Whiteheads
Client	Rhondda Cynon Taf
